

RESPONSE TO FDIC BOARD OF GOVERNORS

August 8th, 2022

To who it may concern: I need to clarify many things within this comment as I only have limited access to my FOIA from the US GOVERNMENT.

My late Grandmother Samuel Young once told me that if one does not know what he is talking about, one should keep his mouth shut.

With that stated and I am addressing the Board of Governors here of that I am well aware. You should be well aware of what I am dealing with along with the impossible hurdles that have been placed before me.

Let me point these hurdles out:

1: What your meeting and what you are requesting me to comment on took place in 1962 & 1963 "see attached Congressional Archive 800 plus pages" I read that about this as long as you will, NOT AT ALL.

2: I have no representation nor will I have living on the SSI I receive "840.00 per month" I'm afraid I can barely eat as it is. I used to have a farm and spend more on a bottle of wine. The US Government thought should keep my part in this quiet and place me under the Privacy Act of 1974 and Dodd Frank. This I thought was to protect me, as it turned out it has allowed the US Government with the help of my family a certain Bank in Little Rock to take control of myself and my funds along with my life. For what? I only did what every investor tries to every day of the week. Now the government wants to put me in a long term state run hospital because I am supposed to have a terminal disease. I think not, as you should be aware there is a do not recesitate on my driver's license. Why give me what I am owed as opposed to acting like you care as the government could care less. Why we're so kind, they went as far on the Federal Register to discuss my life expectancy and how to keep as much of money as possible. That really makes me proud to be an American don't mind saying this to you or the President or anyone else.

This issue with me should be a wake up call if nothing else as to the banking regulations. They operate on way too thin of a margin. When the banks "Francesca" have to pool their money and go to the US Treasury to borrow 2 Billion USD I may be considered incompetent, however there is a problem somewhere. When it takes the US Treasury and IRS 6 years to rebuild my taxes, there's a problem somewhere also.

3: SWAPS: On all my issues the Government request someone to vouch for me. I can only assume this is the US Government trying to be funny with all the surveillance surrounding me, I have as much if not more than the President 24/7 365 days per year, I can not go to the restroom without Congresses Sub Committee watching with captions.

I have a Conservator going to Belgium to hold Shareholder Meetings so they can avoid the legal notice required by law to Shareholders via the Wilkie's Law Firm per CFTC instruction. Therefore at this point I am requesting a hearing in regards to violation and who knows how many other violations they have committed I also am requesting a full audit. This conservator need there head examined if they truly believe they are entitled to 50% of my funds. I will state here and nobody has a right to my funds without my ok, I'm still breathing people are just plain crude!!

- I contacted the St.Louis Federal Reserve not long ago I am sure you are aware, if not are you know now and filed a complaint. Your response was that it was a matter of law and not for you to decide. If this Board of Governors has any empathy at all they will finish this document. Once finished I want you to put yourselves in my shoes and ask yourself this really sound like a guy that needs conservator? I would most definitely need a money manager with this much to invest, infact after all the lies and deception I frankly rather not trade ever again my money would better off in real estate. I am not going to open a bank, better put I will not see to the day to day operations of a bank. I would hire people to do so along with traders. Simply put I am disabled with 11 fractures to my spine, I have been off all my medicine since March 2018 when I showed up for my appointment and FBI was telling my poor Doctor what and how to prescribe to me. Rather bold don't you think?

4: CFTC have out and out lied to me for 6 years and led me around by the nose. All the while my so called Conservator misdirects me by using TP Links, Bluetooth, TTY in conjunction with Android Auto. This is a simple thing to do if ones how.

The Board know the kind of money we are talking about, I saw the work sheets at CFTC too. What's to say other than Wow, amazing what using Weighted Shares and Complex Volatility Triggers will do. I even told my buddies in Chicago that I bet those Non Standard Double Diagonal Strangle SWAPS must have looked like a couple of flights of B52's coming at them.

- How is this important? Simple, it makes me look like a complete fool. Best part for those that got caught up in all this is that keeps me out of the courts and holds the damages down to there rather lenient Non Prosecution Agreements, they get there BD's back and everyone is happy. Even my crooked friends in Chicago will get there 536 million that is being held in my Futures account at an affiliate bank in segregated account for taxes. However after reading "Francesca" I now understand that no matter what I say or do, my funds will be appropriated by the US Government regardless of what I do. My money is much better spent on things like the Sunshine Act and whatever else the Congress needs to make themselves look good are much more important than my needs or Civil Rights that do not exist. Why I can not even get a Civil Rights attorney because they are arresting people, technically no violation so says DOJ. So as you can see this will continue until I am dead and gone. I will state in this matter the US Government has a total lack of ethics. I have ask here what would be so wrong with giving 500 million of my own money and let me live out my life? What if I signed an agreement not to sue the banks which they most certainly deserve and there non Prosecution Agreements alliw for. This whole thing has robbed me of 6 years of my life with a Congressional Sub Committee watching my every move. Can you imagine how embarrassing this whole

thing has been. Have seen my credit score go from 825 to 530? Apparently nobody in this country cares about a thing outside of money. All I can say is enjoy it and let the SUNSHINE ACT SHINE BRIGHT. The endless summer fun continues and yes I most certainly would close down Meta.

- 5: SEC and there request like I have stated prior. There will not be any clearing of SWAPS until I can vouch for myself. This should be a non issue with all the funds being held for me. There's absolutely nothing wrong with me. My biggest problem is I have not a Civil Right one. I am only to be shown in the absolute worst light possible soon the Government can justify appropriating my funds just like they did in 1962 & 1963 with the FDIC. Nothing will happen but more of the same, the little guy gets ripped off banks, attorneys along with government makes out like bandit's.

6: My last suggestion the Federal Register. Are you aware that I am now 65 and retired enjoying my Golden years or suppose to be doing so. Let me educate about the Federal Register. I haven't heard of it until 3 weeks prior to my 1st hearing with buddies in Chicago. I will inform you that for someone like me who has Dyslexia it is the most furstrating website ever built and I am being polite here. Even with this kind of money on the line I would really rather not go there. Frankly I am now worn completely out with this whole affair. You had no right whatsoever to give any of my funds to my family as I would not have, I Revoked that Fraudulent Revokable Trust back in January of 2022. As you should plainy see my family could careless about me, they only care about my money. Otherwise we wouldn't be here today and if we were I would have a battery of attorneys doing this as opposed to myself.

I must admit the US Government has clearly given a lot of thought and changed a lot of laws in regards Clearing, FOREX & FUTURES not to mention MARGIN. I would suggest and this is just my opinion. I would certainly raise the margin requirements on the Banks. I would certainly instruct and teach them that back loading trades 8 months after the trade is illegal. This whole thing has been a rather odd ordeal. To go through all these motions to appear that there are changes to make things fair for the retail investors which in alot of cases it will be. However once there is a problem those investors will have such a hard time winning a case they may as well not file. Why would I say that? I am not going to point out all the amendments excetra, however there were so many and I will use today's headline with China. Let's use Mizhou for an example. This will hurt me financially nodoubt just like this meeting for the Board of Governors will. IRS instucted me to comement on the 24th last month, I infact did not as I was under a Whistleblowers Agreementn. I know now without a doubt that I have been labled a Nut Case and not to get one red cent just like my favorite Senator Tom Cotton told me. He should be given award he, apparently he works too many hours! God bless his soul.

I have yet another good idea. If the Shareholder is living in the United States and the Funds, along with Futures or FOREX are Traded here the Shareholder should be notified. Another thing that really needs to be addressed and I fully understand the need of the banks for national security. However I fail to understand when something like this happens, why doesn't come under Title 18 which I filed in the Eastern District of the state I live in as that filing was

dead on. In fact it was used in PA on a large clearing firm with a large fine, why they are so nice that they got me mixed up with 1MDB who helped launder my funds too. It just makes me sick to think that non if those other funds will ever come to light being used for there new modern city. I will only mention Dutche Bank, as I can only assume that you have the concerns I have.
